VERSAILLES PAR JEAN-MICHEL WILMOTTE

LANTERN GM (13626)
Ø 55 cm x H 130 cm – 40 kg
Anthracite epoxy an sanded glass

The restoration and illumination of the Richaud hospital built in 1781 was the beginning of the adventure between Jean-Michel Wilmotte, world-rekowned architect and Delisle, high-end bespoke lighting and furniture manufacturer since 1895, member of the Comité Colbert and certified “Living Heritage Company” thanks to its exceptional savoir-faire.

Bringing a new breath to this historic monument was the challenge that both houses wanted to meet together. Thus the first lantern Versailles was born, starting point of a

resolutely contemporary and timeless line of lighting fixtures made for inside and outside. This collection includes three lanterns, three wall lights, a floor lamp and a nomad table lamp.

Versailles highlights are elegance, pure and frank lines, use of materials such as anthracite steel and extra white sandblasted curved glass offering more subdued lighting. It is also available in copper metal finish, curved glass and white alabaster bringing warmth and softness to the interiors.
